
(a) Throughput

change from DoP 2 to DoP 40 (green = increases)

(b) End-to-end latency

change from DoP 2 to DoP 40 (green = decreases)

(c) CPU utilization

change from DoP 2 to DoP 40, in %-points

* sink emits <100 events/s at DoP 2 or 40

0→x: no output at one DoP (events/s shown)

–: not measured
