Storm Word Count on m510: DS2 vs Dhalion convergence (bars normalised per metric, labels = measured values)
(a) Configuration, 100k events/s
(b) Configuration, 1M events/s
DoP
controller check
DS2 tokenizer
DS2 counter
Dhalion tokenizer
Dhalion counter
DS2: 7 rebalances, not converged in 7 checks, final [40, 8]
Dhalion: 1 rebalance, stable from check 2, final [2, 2]
DS2: 2 rebalances, stable from check 3, final [40, 40]
(c) Stage throughput seen by the controller, 100k
(d) Stage throughput seen by the controller, 1M
observed throughput [k ev/s]
max backpressure ratio over all checks: 0.0
(e) Performance of the final configuration, 100k
(f) Performance of the final configuration, 1M
