
LOW (100k ev/s)
MED (500k ev/s)
HIGH (1M ev/s)
dominated DoP
Pareto front (numbers = DoP)
Green arrow (↗) in each panel points to better: higher throughput and lower latency (green corner); lower left is worse on both (red corner).
Flink
Storm
Spark
Kafka Streams
RisingWave
AD (State+Net.)
CA (State)
SG (State+UDF)
WC (Stateless)
Throughput [events/s] (log scale, higher is better ↑)
E2E latency [s] (log scale, reversed: lower latency to the right →)
