Uniform $p=2$
Uniform $p=40$
DS2
Dhalion
Spark: tuners lower latency, lose up to 2.7× throughput
best uniform DoP
RisingWave: all configurations close
Storm: tuners lose 4–38× throughput vs. $p=40$
Flink: tuners reach $p=40$ throughput at 6× its latency
Kafka Streams*: tuners keep throughput, 44–56× higher latency
best uniform latency / latency (↑ better)
throughput / best uniform throughput (→ better)
