Event rate 1000k events/s · at each DoP: one bar per system · × = no value

Flink · Storm · Spark · Kafka Streams · RisingWave

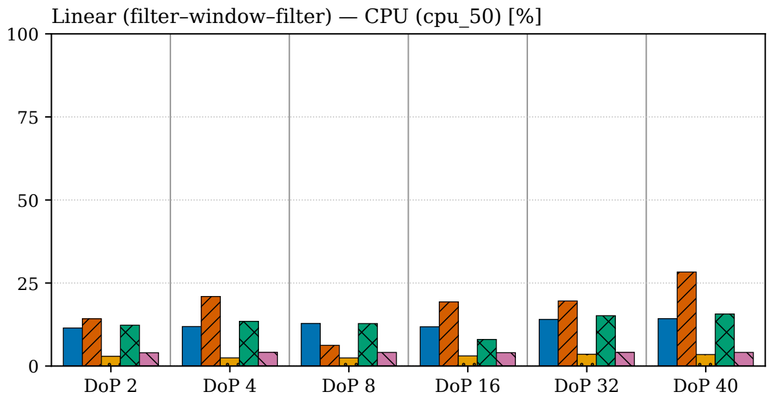

Linear (filter–window–filter) — Throughput (sink output) [events/s]

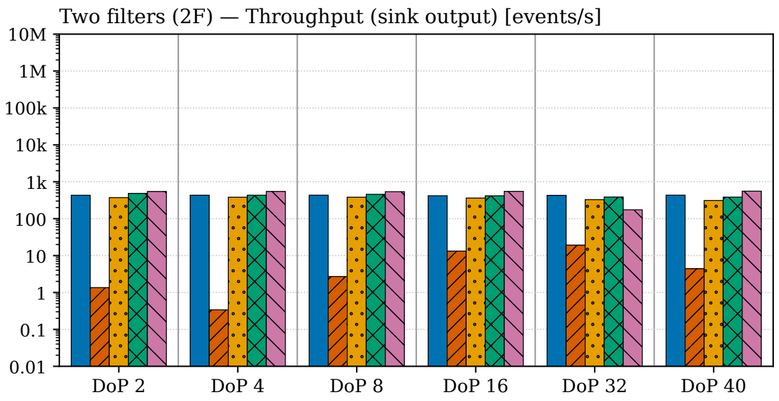

Linear (filter–window–filter) — End-to-end latency [s]

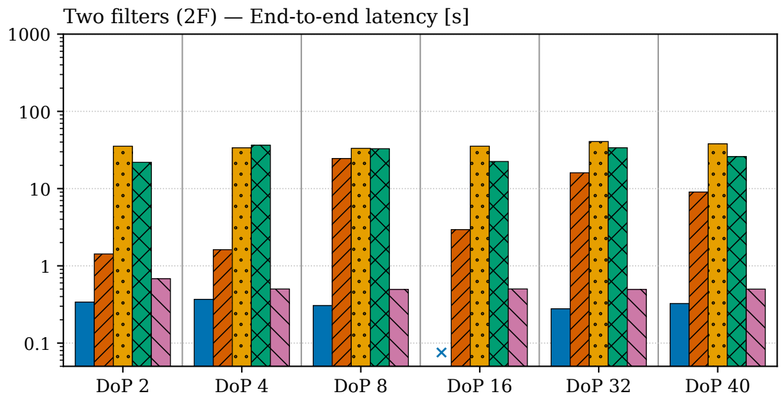

Linear (filter–window–filter) — CPU (cpu_50) [%]

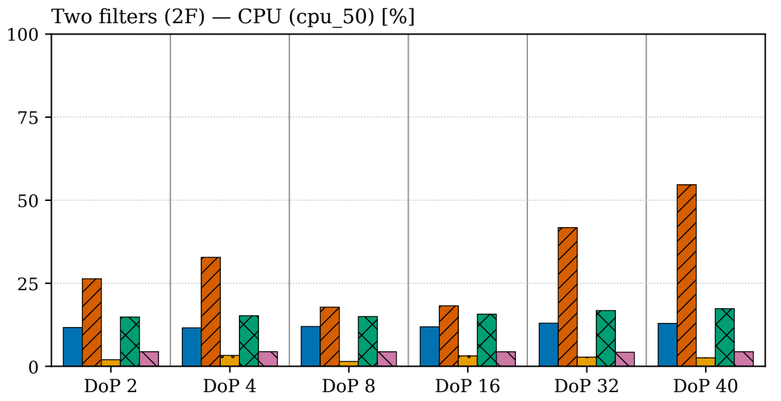

Two filters (2F) — Throughput (sink output) [events/s]

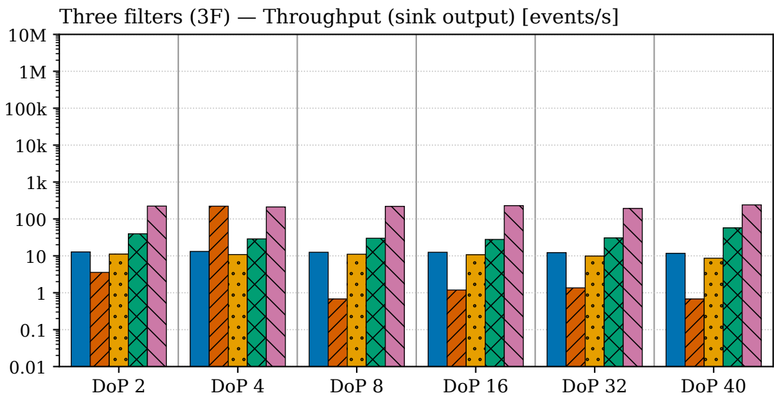

Two filters (2F) — End-to-end latency [s]

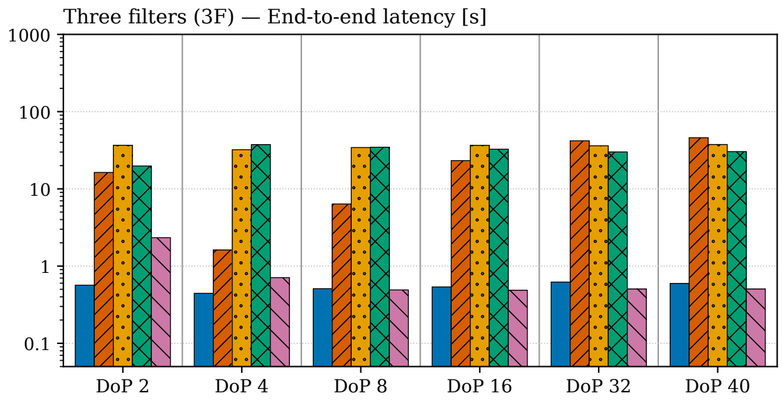

Two filters (2F) — CPU (cpu_50) [%]

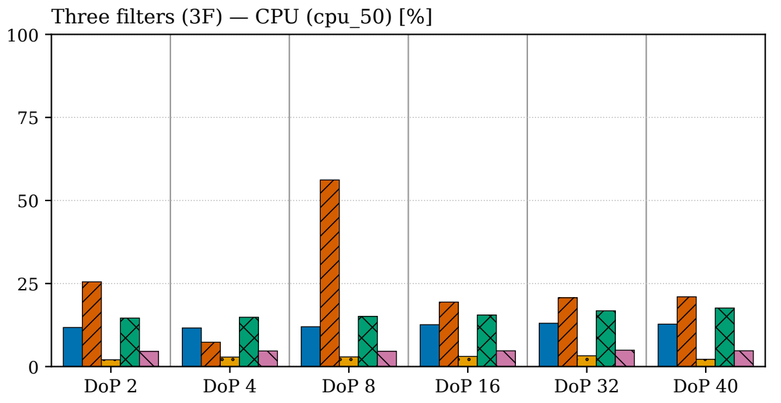

Three filters (3F) — Throughput (sink output) [events/s]

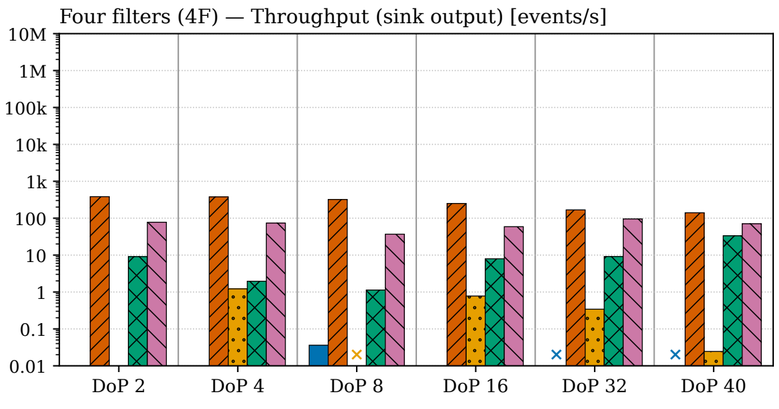

Three filters (3F) — End-to-end latency [s]

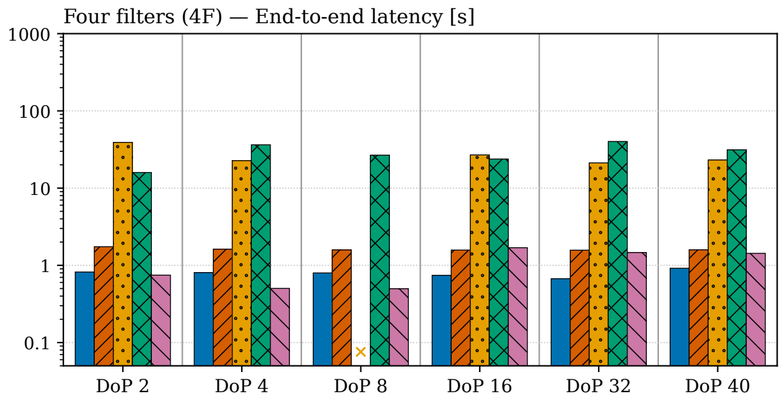

Three filters (3F) — CPU (cpu_50) [%]

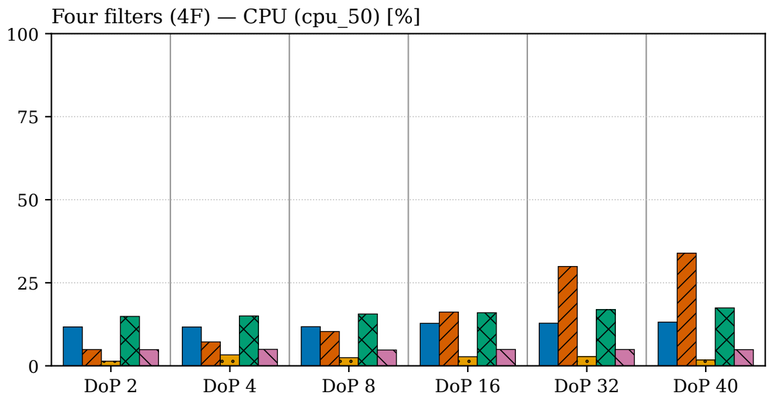

Four filters (4F) — Throughput (sink output) [events/s]

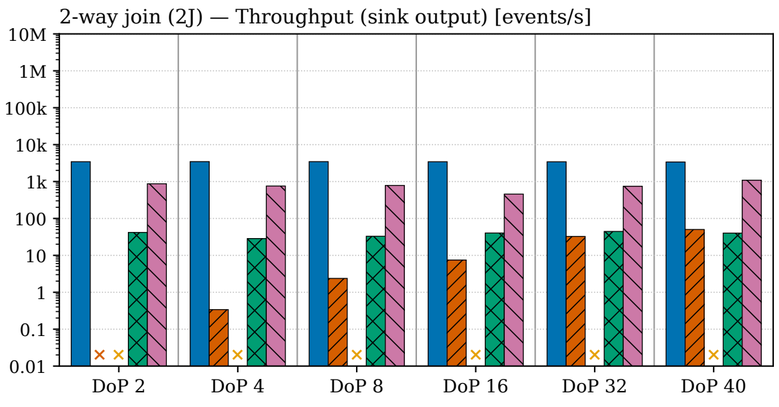

Four filters (4F) — End-to-end latency [s]

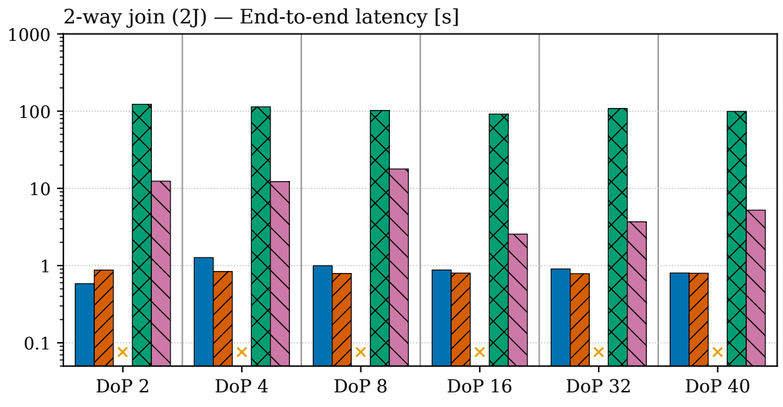

Four filters (4F) — CPU (cpu_50) [%]

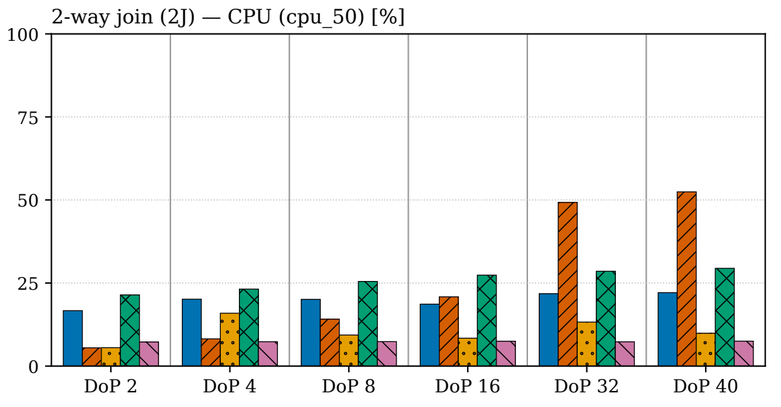

2-way join (2J) — Throughput (sink output) [events/s]

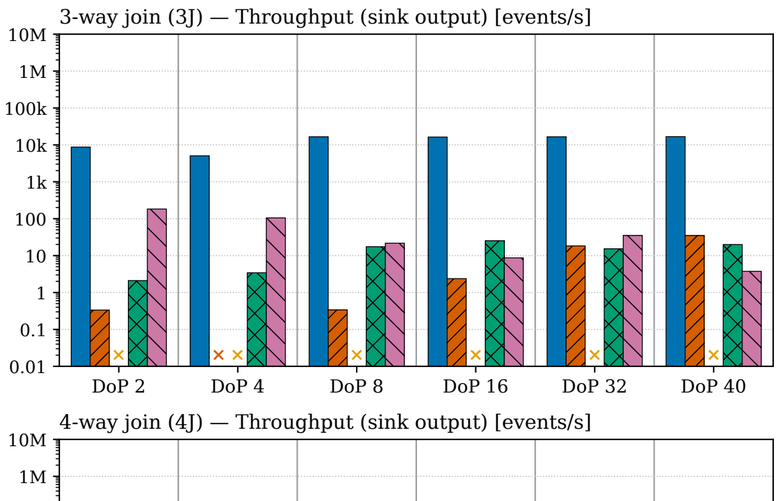

2-way join (2J) — End-to-end latency [s]

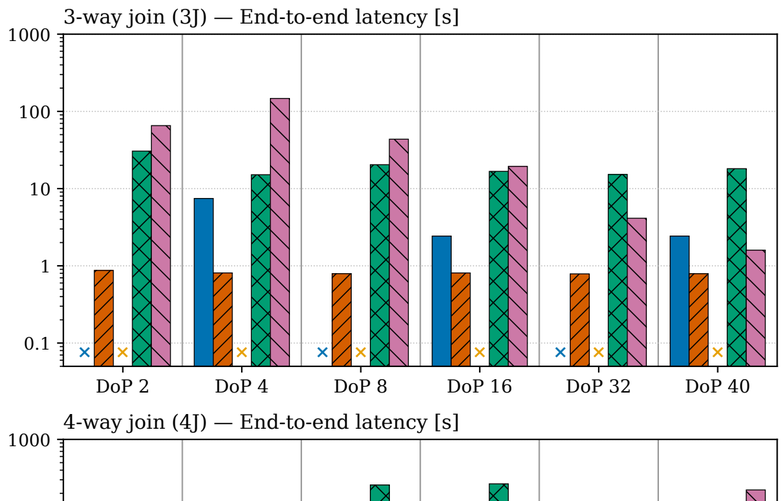

2-way join (2J) — CPU (cpu_50) [%]

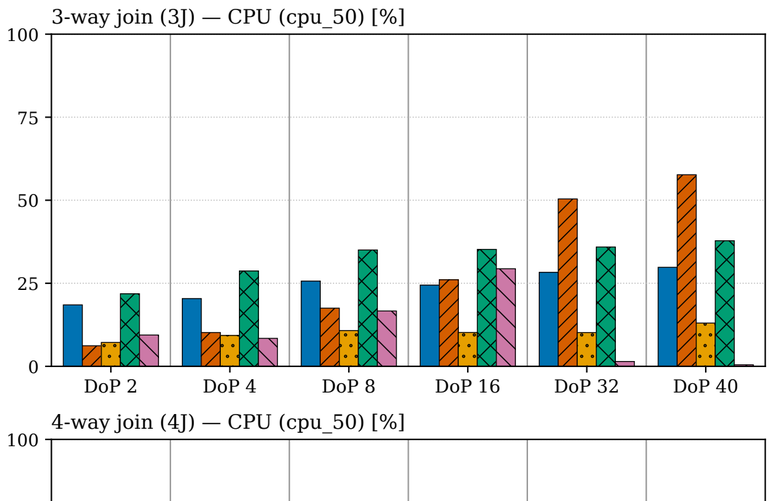

3-way join (3J) — Throughput (sink output) [events/s]

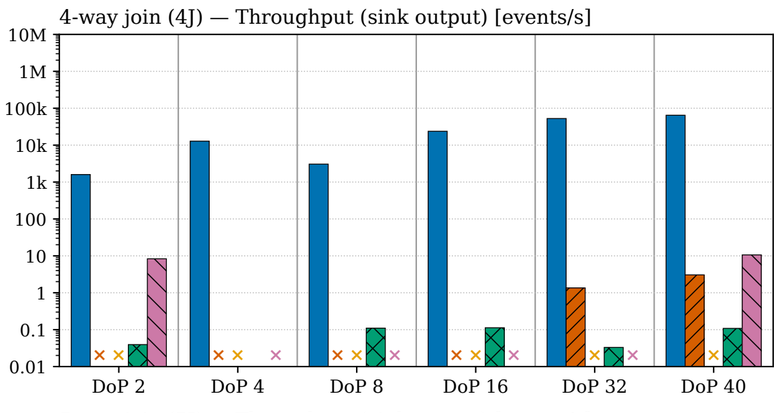

3-way join (3J) — End-to-end latency [s]

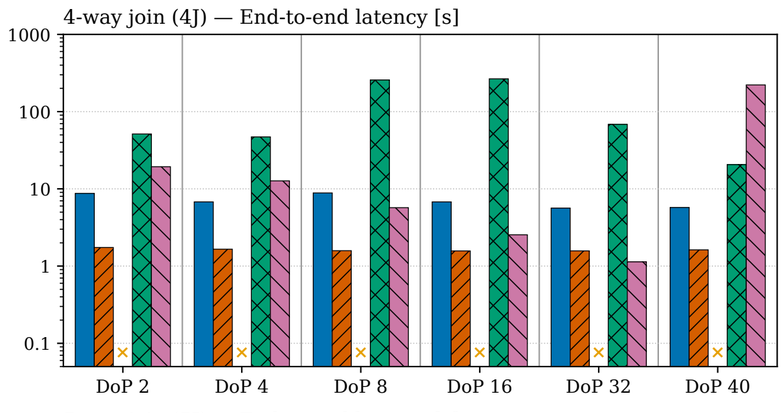

3-way join (3J) — CPU (cpu_50) [%]

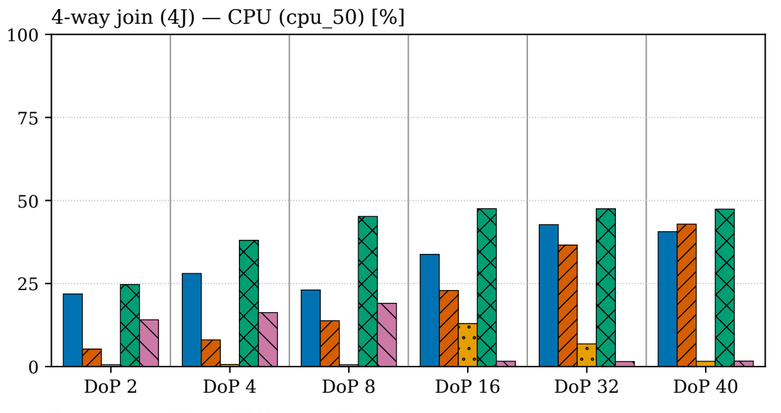

4-way join (4J) — Throughput (sink output) [events/s]

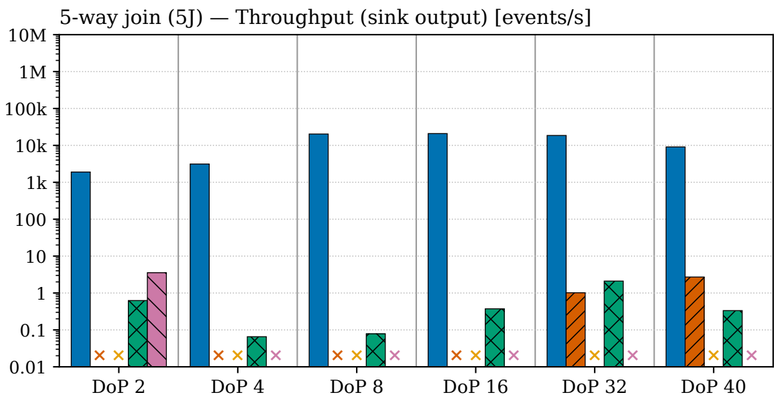

4-way join (4J) — End-to-end latency [s]

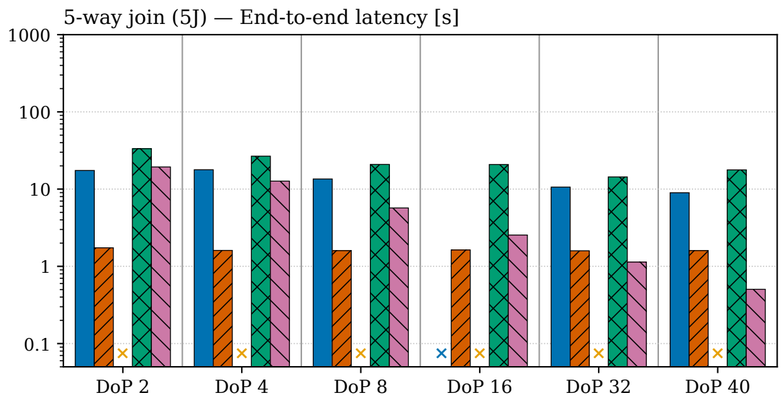

4-way join (4J) — CPU (cpu_50) [%]

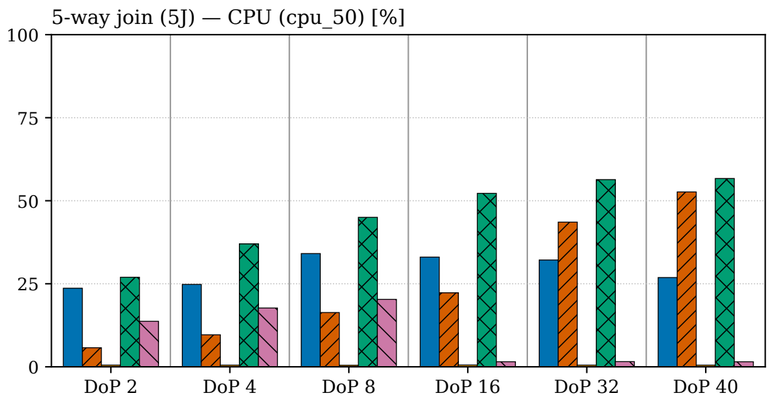

5-way join (5J) — Throughput (sink output) [events/s]

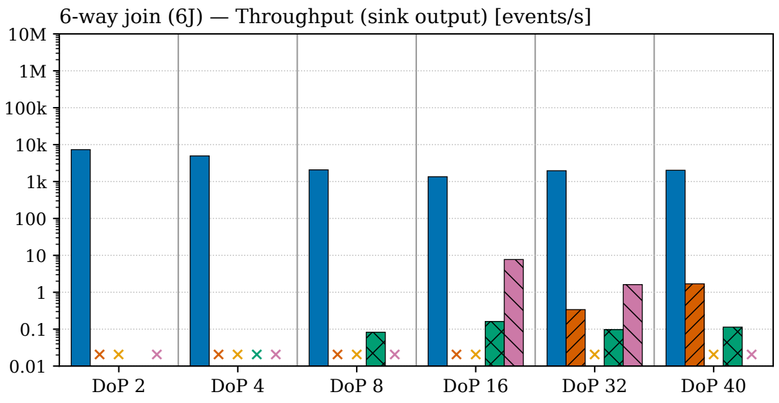

5-way join (5J) — End-to-end latency [s]

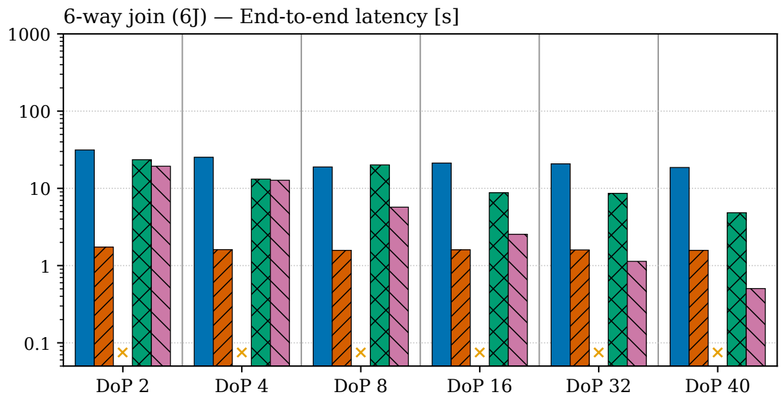

5-way join (5J) — CPU (cpu_50) [%]

6-way join (6J) — Throughput (sink output) [events/s]

6-way join (6J) — End-to-end latency [s]

6-way join (6J) — CPU (cpu_50) [%]
